DESCRIPTORS: *Plants (Botany), *Genetics,
Morphology (Biology), Seeds

It was found possible to successfully utilize hybridiza-
tion of plants by means of grafting to obtain new fruitful
types of plants. Grafting hybridization within a species
and between species formed heterogeneous material,
but its character was different. A graft within a species
yielded offspring combining characteristics of the graft
and the wilding, and even new growth, but grafting be-
tween species—only new growth, which is defined by

AGROMETEOROLOGY. 1961, 300p. 67 refs. PL-480

Agr.

Order from OTS \$3.00

60-51044

Trans. of mono. Agrometeorologiya, Leningrad, 1958, [376p.].

DESCRIPTORS: *Agriculture, Meteorology, *Plants, *Climatic factors, Soils, Humidity, Moisture, Weather stations, Snow, Wind, Grasses, Tobacco, Vegetables, Fruits, Diseases, Freezing, Forestry, Weather forecasting, Climate

This book deals with problems of agrometeorology, the characteristics of field climate, the significance of weather in agricultural production, the influence of the soil moisture cycle and of moisture reserves on the life of cultivated plants, as well as harmful weather (Agriculture, TT, v. 7, no. 12) (over)
